

Print Matters

15 September - 15 October 2022

ASP Gallery, Poland

How can print mediate in an age of algorithms, big data and artificial intelligence? Does scanning, scrolling and browsing digital images augment our reality? As a collection of works on paper, this group show is a beacon of kinship and a manifestation that print matters.

Grafikk is committed to the expanded field of printmaking; in the making, exhibiting and publishing of contemporary art. Art and Craft imparts expertise in material and haptic processes, as both formal and tacit knowledge; through fine art undergraduate, postgraduate and doctorate programmes.

Oslo National Academy of the Arts is grateful to Academy of Fine Arts Jana Matejki for the opportunity to exhibit artworks by students, staff and alumni in Krakow.
